IRAQI NETWORK Company

IRAQI NETWORK Company

About Us

General View

Iraqi Network is one of the largest and most experienced Iraqi Groups. It is also one of the largest Iraqi companies in the field of commercial agencies .We are representing or have a cooperation agreement with more than 50 well-known international companies. Our company works in Supplying & Contracting & Key Projects especially in officially representing foreign companies' interest in Iraq. Our work is devoted to promote these companies products and provide necessary services when needed, which includes following up and implementing all concerns of the represented companies

inside Iraq. Our services start with the introduction of the company products inside Iraq all the way through finalizing their supply contract and receipt of its goods by the end users.

IRAQI NETWORK Company

IRAQI NETWORK Company

Our Emerge

We were established and licensed from the Iraqi Ministry of Trade in 1999 (dated: 4/10/1999) in accordance with current Iraqi laws concerning companies and commercial agencies (company law no. 11 of 1983) and (Agency law no. 51 of 2000).

Iraqi Network's role was and still is to search for well-known international manufacturers and suppliers and interest them in either exploring the Iraqi market as a potential target for their product or resume their activities.

IRAQI NETWORK Company

Starting Point

The economy began to recover soon after the end of Iraq-Kuwait conflict and specially after signing the Memorandum of Understanding also known as (MOU) between the UN and the Government of Iraq.

The Iraqi economy is considered one of the strongest in the Middle East as Iraq still has one of the largest oil reservoirs in the world. Our company basically works under the Oil for Food program, also known as Memorandum of Understanding (MOU). The MOU allows Iraq to sell its oil in the international market and purchase food and medicine. The MOU has a 6 months term and is up for renewal by the UN Security Council at the end of each term. A special

committee supervises all contracts to determine the exact needs of the Iraqi people. Also, all the commercial activities increased when UN authorities accepted to include with this program other categories such as Electricity, Water & Sewerage, Transportation, Communication and other.

Iraqi Network's role was and still is to search for well-known international manufactures and suppliers and interest them in either exploring the Iraqi market as a potential target for their product or resume their activities if the suppliers already had worked in the Iraqi market before 1991.

Our company has already succeeded in signing contracts between several Iraqi customers and the international companies that we represent. These contracts

IRAQI NETWORK Company

had exceeded a total amount of thirty five million USD in the past five years only and all UN approved contracts have been implemented successfully with full clients' satisfaction. All this success was possible because of the mutual efforts of the companies that we represent and the successful planning of Iraqi Network's top management. Our goal is to protect the interest of the companies that we represent in Iraq by ensuring only high quality

IRAQI NETWORK Company

IRAQI NETWORK Company

Our Aim

Our aim as your commercial agent is to seek proper and potential clients for your products and to offer support in promoting your products and services in the Iraqi market.

Companies that have chosen **Iraqi Network** to represent them in Iraq as their agent have benefited from the following:

- 4 years of experience in promoting international companies to Iraqi clients.

Our total signed contracts have exceeded the mark of 35 Million US dollars in the last 5 years only.

- A diverse and well-informed staff that is able to obtain all governmental tenders and potential contracts in Iraq. Our companies then study all these orders and choose the ones that fall within our represented companies products and bids for them.
- Following up with all bidding and contracts to assure the success of implementation. Our company also continues to work with both suppliers and customers until the product reaches its final destination to assure repeated customers.

IRAQI NETWORK Company

IRAQI NETWORK Company

- In-house technical staffs such as electrical and mechanical engineering teams that are able to hold seminars and fairs to introduce new products and technologies.
- In-house legal staff to provide our represented international companies with latest translated legal studies. Our studies emphasize on laws that affect any international investment or commercial transaction in Iraq. All studies will be available through our web site for order.
- Fully equipped offices with the latest communication technologies to ensure swift transaction and correspondence.

Activities

Iraqi Network is the international trading company of Iraqi Network and specializes in export and import of general commodities to countries in the Middle East, Gulf area, and Africa.

Iraqi Network is also the exclusive representative of several international well-known manufacturers. These companies have various product folios of different trade goods and an excellent after-sale support.

Iraqi Network is widely known as a reliable, efficient trading partner.

Iraqi Network is engaged in the engineering and contracting of telecommunication and information technology. It offers solutions in all high tech opportunities.

Iraqi Network is operating in different countries in the Middle East and North Africa through a variety of sponsored branch and joint venture arrangements, our

international partners provide specialized design, engineering, project management and construction and contracting services in each of the sectors that we serve.

Iraqi Network provides a complete package of support services tailored to individual needs ensuring that our partners are best placed to successfully secure and execute major contracts in this market.

Iraqi Network provides early identification of project opportunities, regularly updated market intelligence, support and guidance in local issues such as sourcing and pricing and thereby help develop the most appreciative competitive strategy. As a result we are pleased to be able to say that many of our international partners have achieved significant results through successful participation in the many projects relating to the continuing development of the country's infrastructure.

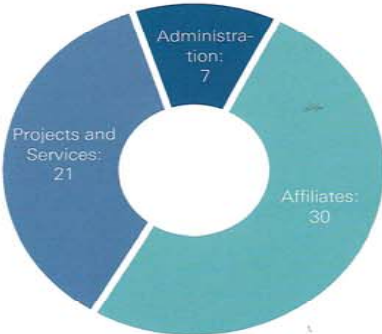

IRAQI NETWORK Company

Company Structure

A flat hierarchy and short decision making processes

Our organisational structure is composed of functional, target-orientated and transparent entities that form the basis of our performance and customer satisfaction. Flat hierarchy and short decision making processes enable economical and individual solutions.

Management Report

Development of the company

Iraqi Network finished the financial year with a significant increase of both turnover and profit. As with the Iraqi economy, export is of decisive importance for growth of the company. Besides the important Iraqi Network, with its headquarters in Beirut, counts thirteen employees and fifteen freelance engineers. Building on the activities of 2010, described in the following, the present contract situation of the company makes sure solid growth for 2011.

Situation of the industry sector

Iraqi Network is active in the sectors of energy and railway engineering. Both are heavily dependent on investment and promotion by the state. Power plant projects cancelled in the crisis year of 2009 have resulted in a shortage of orders which could not completely be compensated for 2010. New investment in the paper in the fundamental overhaul of the energy supply system as a whole.

With an accelerated development of renewable energies, climate protection, supply security and profitability are in the centre of attention for the following years to come. For further integration of renewable energies in the energy mix, both the construction of highly efficient coal and gas power plant as well as a massive extension of the electricity supply grid are necessary. However, the feeble domestic demand was counterbalanced through increasing exports into developing and newly industrializing countries. In particular, the high energy consumption of the rapidly growing economies (Middle East & North Africa-region, Central Asia and China) has helped to bring this about.

Appendix (A)

The Investment Projects Which Are Under Specialization of Iraqi Network.

The Power Supply & Industrial Projects Such As:

- Petrol Recycles Stations.
- Cement Industries.
- Power Supply Stations.
- Sub- Electricity Stations.
- Industrial Warehouses.
- Machines Fixation Stations.
- Grains Stores
- Electrical & Air Lines With High Power

Public Places Such As:

- Walk ways.
- Bridges.
- Railways.
- Airports.
- The Water & Electricity Stations.
- Water Exhausting Stations.
- Water & Electricity Towers.
- Water Liquidating Stations.
- Building Water Weirs.
- Irrigation Systems

IRAQI NETWORK Company

IRAQI NETWORK Company

Clinical & Teaching Buildings Such As:

- Hospitals.
- Clinics.
- Phone operators.
- Pharmacies.
- Schools.
- Universities.

IRAQI NETWORK Company

IRAQI NETWORK Company

Residential & Public Flats Such As:

- Residential flats.
- Summer vacation flats.
- Theatres.
- Administration complex.
- Hotels.
- Luxury flats.
- Mosques.
- Libraries.
- Musical halls.
- Meeting halls.

2. RAR Group Company of General Trading/ Jordan
3. Al-Mustafa Company for International Trading/Dubai
4. Representation Office in France.
5. Representative Office in China
6. Representative Office in South Korea.
7. Representative Office in Italy
8. Representative Office in Lebanon.

Appendix (D)

Our Contracting Companies

AL- BASHEER CO Ltd for General Contracting:

- 1.AL-Basheer General Contracting Co. LTD. is among one of the leading general contracting company in Iraq. Mainly specialized in Civil, Mechanical and Electrical projects with many years of experience.
- 2.Our company classified as a first class degree in the Iraqi Contractors Federation and also has the certificates of registration from the Ministry of Planning and Trade.
- 3.We have a consultant engineers specialized in the field of designing,

procurement, construction, and testing, commissioning and training work.

4. We have many branches located in (Mosul , Basrah , Anbar , Salah Alden ,Daila ,karkuk , Hilla, Mesan , Najaf and Kut).
5. We also have a good experience in the commercial field we are representative some famous companies in the medial East and Europe which was supplying many humanitarian goods to Iraq through our company .

IRAQI NETWORK Company

IRAQI NETWORK Company

REMAL AL-KAEEM CONTRACTING CO.:

Due to our wide experience, Remal Al-Kaeem Contracting Co. "**RK-Cont.**" is fully ready and equipped to perform the services in the following fields:-

- 1- Electrical and electronics measurements.
- 2- Electrical power generation systems.
- 3- Instrumentation of electrical power systems.
- 4- Installation of high voltage line towers.
- 5- Installation of high voltage underground cables & high voltage transformers.

- 6- Installation, test, and supply different lighting systems.
- 7- Buildings and industrial plants.
- 8- Rehabilitation boilers for power station systems.
- 9- Supply and install water treatment systems.
- 10- Design, install & manufacture different steel structures.
- 11- Central heating and cooling.
- 12- Cooling and freezing storage.
- 13- General control board for high voltage and low
- 14- Voltage electrical power systems.

AL- HAWMEL CONTRACTING CO.:

1- Al- Hawmel Co. is specializing in the following fields :-

- All civil works.
- Air conditioning
- Water supply plant and pipe networks.
- Sewage treatment plant and all pipes networks.
- Electrical works.

3- We have consultant engineers specialized in the fields of designing, construction, testing, and training works, and most of our engineers are works in wide field for a large projects.

4- Constructing of store building in AB-GRAB.

5- Casting with reinforced concrete for square (18500 m²) in stores of AB – GRAB.

6- Constructing of complete water supply plant and network pipes in the following places.

- Said – Alratbi.
- Alhabiny.
- Algeara.
- Akashat.

8- Constructing complete electrical network involves install Qusik (M.D.B) for the following places :-

- Said – Ratbi.
- Lhabina both (interal & Alhathiba).

- 9- maintenance of all Qusiks in habina both (Internal & Hathiba)
- 10- Constructing of complete network for sewage in habina which involves :
- Construction of (17) pumps station and install submersibles pumps in each.
 - Construction a network pipes for the drainage system.
 - Make maintenance for the old treatment plant in Habina for all stage.
 - Begging works for constructing a new treatment plant in (C. C).

IRAQI NETWORK Company

IRAQI NETWORK Company

AL- FURKAN CO Ltd for General Contracting:

- Al-Furkan general company, one of the major Iraqi companies which is specialized in construction and building. In fact, our company is a combination of the wide and extensive work experience along with the variety of specializations. It is one of the private sector companies and an active member of both Iraqi chambers of commerce and Iraqi contractors union.
- Our company has a staff of well qualified and specialists in all scope of civil, electrical, mechanical, technical works, which participated in the fulfillment of many far- reaching and wide ranging strategic and developing projects for both public and private sectors and according to the high level quality and quantity. In addition to that, our company has an excellent experience in

supplement of materials, equipments and technical instruments that respond

- to most of the insisting needs of many private and governmental establishments and institutions.
- On the other hand our company had built influential and vital cooperation and business relationships with famous and well known international and Arabian companies that's why our company always be in touch with the latest and newest technical and scientific ways.

IRAQI NETWORK Company

IRAQI NETWORK Company

Here are some of the main projects which have been achieved by our company:

1. Establishment of earth dams and stone paving for Al-Furat banks.
2. Establishment of sand roads and paving roads in the Western district.
3. Establishment of sand roads and paving roads in Al-Muthenna province.
4. Establishment of sand roads and paving roads in Al-Dhuluiya.
5. Building drain stations and opening new drains in Al-Basrah and Mara.
6. Establishing and lining irrigation net in Al-Baghdadi.
7. Establishing and lining irrigation net in Al-Diyala.
8. Casting cement and operating concrete factories in all southern provinces.

9. Building sheds in Salah Addin.
10. Earthworks for Al-Taba'at airport.
11. Building a housing complex in Meesan for Ministry of Agriculture.
12. Building cooled stores in Meesan province for Ministry of trade.
13. Building (14) houses with fences for General Co. of Iron & Steel for the advantage of Ministry of Industry.
14. Establishing Medical Jurisprudence building in Diyala province for the advantage of Ministry of Health.
15. Rehabilitation of Technical Institute Building in Diyala province for Ministry of Higher Education.
16. Building concrete bases for southern Baghdad station for Electricity Staff.
